We, at Rockford Fosgate, have worked very hard to make sure all the information in this manual is current. But, as we are constantly finding new ways to improve our product, this information is subject to change without notice. The "Swirl" illuminates with the output signal level. The amplifier will automatically shut down if this occurs. Page 5: Installation Power Terminals â€" The power and ground are nickel-plated captive c-clamp wire connectors and will accommodate up to 4 AWG wire. Fuses â€" These ATC fuses are easily accessible in case of failure. Always replace fuses with same type and rating. See Specifications for the rating of the fuse to be used. DO NOT install the fuse at this time. Use the ring terminal to connect to the battery positive terminal. NOTE:You can mount this unit in a variety of ways. Remove the back housing by using a small flat screwdriver in the slotted hole at the back. The housing can be installed with the mounting tab up or down, or left off for in panel installation. Page 9: Adjusting Gain Next, increase the amplifier gain setting until adequate volume is achieved. Rockford Fosgate source units do not distort, so the volume can be used at maximum setting. NOTE:Best signal to noise and dynamic range are realized with the gain at minimum. Most users find adequate gain and volume is achieved at about halfway in the adjustment range. Placing the switch in the AP position sets the amplifier to the All Pass mode, preventing any crossover adjustment, allowing all frequencies to pass. Procedure 1: Check Amplifier for proper connections. Check in-line fuse on battery positive cable. Para-Punch Remote Bass Control This adds an adjustable center frequency control with the adjustable boost control. See our web site for other accessories to help you get the most out of your system. Page Limited Warranty Information Some states do not allow limitations on the length of an implied warranty, so this limitation may not apply. No person is authorized to assume for Rockford Fosgate any other liability in connection with the sale of the product. Page Installation Les sources audio Rockford Fosgate ne produisent pas de distorsion, vous pouvez donc mettre le volume au maximum. Bear in mind, I work with audio and live sound for a living, so I thought this would be cake. But car audio installation is a different beast. So here's my 2 cents that might save another customer hours of aggravation if they plan to install this themselves. Running 8 gauge power to your battery with no additional fuse to separate it from the source can be dangerous and the fuses in the sub aren't going to cover this. But there's a bridge within the amp itself and you will need to cut this cables RCA ends off and splice the R positive and L positive, R negative and L negative into your cars speaker harness using a T-TAP and quick connect that you can get from any advance auto parts. This was my mistake but I misread the instructions and wasted SO much time attempting to run a remote wire to my head unit and fuse box that I didn't even need, because at the high level input it has an intelligent turn on that senses audio and turns the sub on by itself. Break the sub in slowly, do not turn up the setting for a few days and let that speaker move air without going crazy. Once it's broken in, enjoy the little powerhouse that this lightweight little sub is. In my Civic Si it rattles my windows and fills the car with the most crystal clear, tight heavy bass without being overwhelming. It's perfect!! If you're on the fence between the 10" and the 12" get the 10". I like clean bass, this delivers. I am running mine off of high level inputs in a civic SI. If you want to rattle your doors off then you might be disappointed. If you're in the over 30, 3 kids and a wife crowd then this is the sub for you. It was amazing. Here I am in my 40s, missing that kick in my commute. Thus, I ordered the P for Father's Day. The next day I installed it in my mid-life commuter car--a Toyota Prius. Yeah, that's right--a Prius. It saved me 5k in gas last year I'm over it. Anyway, the P exceeded my expectations, especially in a small car like this. Definitely the booming-est Prius in the gated neighborhood. My wife suggested this purchase is the sign of a possible mid-life crisis. I told her it's cheaper than a Corvette or a boat. She agreed. So if you see a cool Prius bumpin' Bone Thugs n' Harmony, driven by a responsible and practical man I followed the advice from previous reviews and ran a remote wire with the coax and everything worked great. I'm pretty sure this thing cracked my windshield due to the harmonic vibration of the rear-view, and I'm totally okay with that. I purchased this for my wife as a Christmas gift, who wanted a bit of bass in her mustang. After all of my searching for a powered sub enclosure I came across this my absolute favorite name brand "PUNCH" and purchased. Never again will I purchase Rockford Fosgate equipment. I can only hope that I can recoup some of my money spent to put towards something that sounds better than this. I am more than disappointed in this little set up and believe that I should have done some research on it before purchasing. I cannot express how unhappy that I and and embarrassed that even my wife cannot believe that I purchased something that sounds so bad. You get what you pay for. So I've always been one to try and get the "biggest and best" of anything, especially when it comes to sound. I'm a music maniac who always loves it too loud. I've been so impressed with how good and strong these things sound for what they are, that I have actually been convinced I really don't need anything bigger or louder or stronger ever again! I recommend to ALL! I read a lot of reviews and decided to go for it. It sounds great and connected easily. Get the install gear cable 8 gauge its good flexable and true 8 gauge. I bought the install gear wire and separate fuse, and 4 gold plated fuses. Hooked it up using my rear speaker high level inputs and it works awesome on "DC offset" for the power on feature. Two weeks into it the sub stopped working or so I thought. Got out the volt meter and found that the fuse that came with the fuse holder was faulty not blown so I replaced it and its back in action. I like that I can use it with my stock stereo, I like that it has a auto on feature, I like that its not drawing much current watts. Over all if you want a little bump in the trunk and don't want to spend too much go for it. I love it. Happy camper! See all reviews. Top reviews from other countries. Muy cara la importacion y la conversion de dolares,el empaque de fabrica, por el precio del envio podrian agregar uno adicional ya que llego con un ligero golpe El producto excelente. El sonido de baja frecuencia supero mis expectativas aunque no hara retumbar los cristales. Recomiendo usar low input ya que eso permite ajuste de corte. El control remoto de volumen excelente. I got the 12" model and I would say it's plenty for the Bose system in my Mercedes W E55 and since it's mounted on the floor in the passenger rear foot-well as I have no back seat I probably could have went with the 10" and it would have been enough. Quality is good and instructions clear. Very easy to install and feature rich unit, I would

recommend for a compact sealed powered sub of good above average quality. The finish of the vinyl wrap is much nicer than a cheap carpet IMO. Report abuse. Definititivamente recomiendo este subwoofer, la calidad de su sonido es excelente supero por mucho mis expectativas, si estas dudando en comprarlo o no, no lo pienses. Despues de probar con otros 2 subwoofers planos debajo del asiento aunque este es un poco mas grande , no hay comparacion en cuanto a profundidad, nitidez y calidad del sonido. One person found this helpful. For the price, you get a sub, box, amp and a very convenient quick connection. There is enough control over the XO and it blends in with my system. And, for the price, you get a remote gain control so you can adjust from your dash. Quick and easy to install and set-up. Customers who viewed this item also viewed. Pages with related products.
